ARDUINO TO 16x2 LCD DISPLAY USING PROTEUS

AIM:

To write an Embedded C program to interface Arduino Uno and 16 x 2 LCD display using Arduino Uno and Proteus

SOFTWARE REQUIRED:

- Proteus 8 software.
- Arduino IDE software

Program

Arduino to 16x2 LCD Display using Proteus

```
#include <LiquidCrystal.h>

LiquidCrystal lcd (7, 8, 9, 10, 11, 12);

// your PWM numbers may be different

void setup() {

  lcd.begin(16, 2);

  lcd.print("put your message here");

}

void loop () {

  for (int i=0; i<13; i++)

  }
```

```
delay(700);
```

$$\left. \begin{array}{l} \} \\ \} \end{array} \right\}$$

Output
