EMBEDDED C PROGRAM TO DISPLAY “HELLO WORLD” MESSAGE

AIM:

To write an Embedded C program to display “HELLO WORLD” message using Keil software.

SOFTWARE REQUIRED:

- Keil software

Program:

```
#include <reg51.h>; #include <stdio.h>;

void main (void){

    SCON = 0x50; /* SCON: mode 1, 8-bit UART, enable rcvr */ TMOD = 0x20; /* TMOD:
timer 1, mode 2, 8-bit reload */ TH1 = 0xFD; /* TH1: reload value for 9600 baudrate */
    TR1 = 1; /* TR1: timer 1 run */

    TI = 1; /* TI: set TI to send first char of UART */ while (1)
    {
        printf(&quot;Hello World ! \n &quot;);
    }
}
```

OUTPUT:
